## **Science Teachers and Administrators, San Antonio has an Astronomical Society!**

We are a non-profit educational organization that works in the outreach of the public towards a better education and understanding of astronomy and all space-related issues.

Let us help you in your astronomy presentations with your classes!

Here are some of the items that we can provide for you:

- Presentations in the many areas of astronomy relating to your current course material.
- Bring professional-grade telescopes to your school for students to see and use. (Weather Permitting, of course)
- Observe current phenomena in the sky such as the Sun, Moon, Planets, and even spacecraft in orbit!
- Discuss current expeditions in space exploration.

**All of this is at no cost to your school!  
We do this to share our love of astronomy and the night sky!**

If you would like to schedule an event, please contact:

Ms. Danielle Rappaport—SAAA Public Programs Coordinator
